NEW! Dust extraction guards:

System solution to ensure low levels of dust when cutting & slotting

Bosch's dust extraction guards ensure that you now also have clear visibility when cutting with angle grinders in stone and concrete. The dust extraction guards are available for all common Bosch angle grinders and ensure efficient dust extraction in every application due to their clever design. Together with the Bosch dust extractors, they form the optimum system solution for ensuring low levels of dust when cutting and slotting with angle grinders.

Dust extraction guards for small angle grinders

GDE 125 EA-S Professional
Part no.: 1.600.A00.3DH

GDE 125 EA-T Professional
Part no.: 1.600.A00.3DJ

GDE 115/125 FC-T Professional
Part no.: 1.600.A00.3DK

Dust extraction guards for large angle grinders

GDE 230 FC-S Professional
Part no.: 1.600.A00.3DL

GDE 230 FC-T Professional
Part no.: 1.600.A00.3DM

The cutting depth is variably adjustable on all Bosch dust extraction guards. Connecting them to your Bosch dust extractor is also extremely easy. Attach the dust extraction hose to the dust extraction guard directly or using a power tool adapter – whichever you prefer. The dust extraction guards not only give you a clear view of your workpiece, they also save you time when cleaning up and protect your health!

Here you will find the right dust extraction guard for every angle grinder.

NEW! More power & endurance than ever –

the new small angle grinders now with 1300 or 1700 watts!

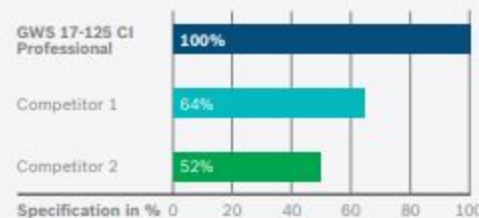

What counts in industrial applications is high productivity, fast work progress and reliability, which is why we have made our angle grinders even more powerful and had the lifetime of our tools tested by the internationally respected and independent SLG testing and certification institute. The outstanding results speak for themselves! Of course, Bosch angle grinders also offer many additional features which assist you during work and provide even more user protection.

Test winner in average lifetime and carbon brush lifetime

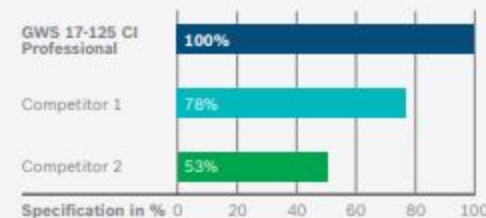

GWS 17-125 CI Professional

Average lifetime

Average carbon brush lifetime

Intelligent Brake System

The brake ensures up to 80% faster disc stop.

KickBack Stop

Greater protection because the tool automatically shuts down if the disc jams.

Restart protection

Prevents the tool from automatically starting up after a power cut.

Deadman switch

The angle grinder runs only with the switch pressed. When the switch is released, the tool shuts down automatically.

Vibration Control handle

Patented vibration damping system to ensure low user fatigue.

Constant Electronic

Power booster for heavy loads. Constant speed, even under load.
